

## Mock Exam for Mathematics (Summative)

Name \_\_\_\_\_ Date \_\_\_\_\_

*Imagine being a teacher, and need to prepare a final exam for your students. Based on what you have learned, you will need to ensure that the questions cover all the chapters we have done in this course.*

You may develop this independently or in small groups. If you do this assignment in small groups, please know that the marks will affect every student in the group.

Some minimum requirements for the mock exam:

- Must have a **variety of questions** (multiple choice, matching, short answer, long answer)
- Must have one or two questions from each chapter.
- Must be your own creation (try to refer to the Internet, not just the textbook)
- A section states the categories of **Knowledge/Understanding, Thinking/Inquiry, Communication, Application**
- Create your own **solutions sheet**

Keep in mind that some of your students may be ELL students and may need pictures or word banks to make the test completed in class time.

There will be a rubric which will be used to mark your “Mock Exam”

## Mock Exam

Student name: \_\_\_\_\_

Mark total:           /24

Category →	4	3	2	1
<b>Required elements: Communication/ Knowledge/ Application</b>	Exam includes all the required elements as well as a few additional elements	Exam includes all the required elements and one element	Exam includes all the required elements	One or more required elements are missing from the Exam
